## 今村泰二コレクションの目録発刊にあたって

今村泰二先生（2005年逝去）は、我が国はもちろん、世界的にもダニ学の研究者として知られ、その学術的発展に多大な貢献をされました。

特に、ミズダニ類の分類学の研究につきましては、第一人者であり、ダニ類の論文等は80編以上にのぼります。

この度、今村先生が生涯をかけて研究に取り組まれた極めて貴重なミズダニ類のコレクション1,541点（タイプ標本327点）を、今村先生の生前からの希望と遺族である今村琢治氏、今村洋一氏、河内まり子氏のご好意により、当館へ寄贈していただきました。また、この寄贈と目録作成にあたっては、菊地義昭、森野 浩、安倍 弘、松本典子、茅根重夫の各氏に多大なご尽力をいただきましたことを感謝の意を込めてご報告申し上げます。

今村泰二コレクションはダニ学の今後の学術研究の発展のためには不可欠の資料であり、また、多数の貴重なタイプ標本をお預かりする責任の重さを痛感いたしております。この目録を発行することにより、多くの研究者あるいは市民の方々に活用いただくことが今村先生および関係者の皆様のご好意に報いることと考えます。

### Regarding the Publication of the Inventory of the Taiji Imamura Collection

Dr. Taiji Imamura (passed away in 2005) was not only a renowned researcher of acarology in our nation of Japan but also around the world, who made a considerable contribution to academic development in this field.

In particular, he was the leading authority in regard to research on the taxonomy of water mites and has written over 80 research papers, etc. on mites.

Recently, his remarkably valuable collection that includes 1,541 samples of water mites (327 samples of type specimens), representing Dr. Imamura's devotion to this study throughout his life, was contributed to our Museum in accordance to Dr. Imamura's wishes before he passed away and through the kind offers of his bereaved family: Mr. Takuji Imamura, Mr. Youichi Imamura and Mrs. Mariko Kawauchi. Further, I would like to extend my deepest appreciation to Dr. Yoshiaki Kikuchi, Dr. Hiroshi Morino, Dr. Hiroshi Abé, Ms. Noriko Matsumoto and Dr. Shigeo Chinone who made enormous efforts to realize the contribution of this collection and the creation of this inventory.

The Taiji Imamura collection is an indispensable resource for future development of the academic research on acarology. In addition, I keenly sense the grave responsibility that is now ours in keeping such a great number of valuable type specimens. I believe that the use of this publication of this inventory by many researchers and citizens will be an expression of thanks for the great favors bestowed upon us by Imamura and the abovementioned related parties.

Hiroshi Sugaya  
Director of Ibaraki Nature Museum

勲三等旭日中綬章受賞を記念して（1985年4月29日）

In commemoration of the Order of the Rising Sun — Third Class (April 29, 1985)

## 今村泰二先生 略歴

1913年（大正2年）12月	兵庫県美囊郡吉川町（現在三木市）市野瀬に生まれる
1934年（昭和9年）3月	岐阜高等農林学校農学科卒業
1938年（昭和13年）3月	北海道帝国大学（現在北海道大学）理学部動物学科卒業
1940年（昭和15年）-1946年（昭和21年）	従軍
1947年（昭和22年）7月	北海道第三師範学校（現在北海道教育大学旭川分校）教授
1949年（昭和24年）6月	北海道学芸大学教授
1954年（昭和29年）8月	理学博士の学位を受ける（北海道帝国大学） 論文名「The taxonomic and ecological studies on water-mites in Japan」
1955年（昭和30年）4月	茨城大学理学部教授
1971年（昭和46年）9月	国際ダニ学会議 終身名誉会員
1978年（昭和53年）4月	紫綬褒章受章
1979年（昭和54年）4月	茨城大学理学部教授退官
1979年（昭和54年）5月	茨城大学名誉教授
1983年（昭和58年）4月	常磐大学人間科学部教授
1985年（昭和60年）4月	勲三等旭日中綬章受章
1989年（平成元年）3月	常磐大学人間科学部教授退職
2004年（平成16年）12月28日	死去当年91歳

## Taiji Imamura's Biography

December 1913	Born in Ichinose, Yokawa-cho (present Miki City), Minou-gun, Hyogo Prefecture
March 1934	Graduated from Department of Agricultural Sciences, Gifu Agricultural and Forestry College
March 1938	Graduated from Department of Zoology, Faculty of Science, Hokkaido Imperial University (present Hokkaido University)
1940 - 1946	Served in the war
July 1947	Became a professor at Hokkaido Third Normal School (present Hokkaido University of Education Asahikawa Campus)
June 1949	Became a professor at Hokkaido Gakugei University
August 1954	Received Doctorate of Science (Hokkaido Imperial University) Title of doctoral thesis: "Taxonomic and ecological studies on water-mites in Japan"
April 1955	Became a professor in the Faculty of Science of Ibaraki University
September 1971	Became a lifetime honorary member of the International Congress of Acarology
April 1978	Received a Medal with Purple Ribbon
April 1979	Retired from professorship in the Faculty of Science at Ibaraki University
May 1979	Became a professor emeritus of Ibaraki University
April 1983	Became a professor in the College of Human Science at Tokiwa University
April 1985	Awarded with the Order of the Rising Sun — Third Class
March 1989	Retired from professorship in the College of Human Science at Tokiwa University
December 28, 2004	Passed away at the age of 91

# 今村泰二コレクションについて

## I 今村泰二コレクションの規模

今村泰二コレクションは、ミズダニ類とウシオダニ類を合わせ、1,541枚のプレパラート標本から構成されている。そのうち、種または亜種まで同定されているものは257種28亜種、1,005枚のプレパラート標本である。また、タイプシリーズは28科59属155種11亜種（名義タイプ亜種を含む）に及び、154ホロタイプ、1レクトタイプ、55アロタイプ、108パラタイプ、9シンタイプを含んでいる。

## II 目録の使い方

凡 例							
上科名							
Hygrobatoidea オヨギダニ上科	科名						
Aturidae ヒラタダニ科	種名または亜種名						
<i>Albia (Spinalbia) makinoi</i> Imamura, 1965	イズズアルビダニ						
30977 Kuraguchidani, Ise Shrine, Ujitachi Town, Ise City, Mie Pref. (三重県伊勢市宇治館町・伊勢神宮神域 倉口谷), 19650619, Taiji Imamura (今村泰二), ♀, adult, <b>holotype</b>

30979 Kuraguchidani, Ise Shrine, Ujitachi Town, Ise City, Mie Pref. (三重県伊勢市宇治館町・伊勢神宮神域 倉口谷), 19650619, Taiji Imamura (今村泰二), ♂, adult, <b>paratype</b>							
標本番号	採集日	採集者	性別	年齢	タイプ	標本の種類	採集地

### 1 リストの配列について

上科の配列は、安倍（2006）に基づき、現在推定されている系統関係に従った。

科、種、亜種の配列は、学名のアルファベット順とした。

同種（亜種）内の標本の配列は、標本番号の順とした。

### 2 種名（学名・和名）について

種名および亜種名については、原則的に安倍（2006）に従い、これに記載のないものについては Viets（1987）に従った。なお、論文として発表された以外の標本については研究途中のものも含まれ、種名については暫定的である可能性がある。例えば、目録中の *Piona uchidai* Imamura はまだ記載されておらず無効名である。日本産のミズダニ類については、Abé（2005）ならびに安倍（2006）を参照されたい。

### 3 標本番号について

ミュージアムパーク茨城県自然博物館の標本は、すべて「INM」の記号で識別されている。動物標本は「INM-1-」の記号の後に番号が付いている。

今村泰二コレクションの標本には、29716から31256までの番号を当てた。リストの各標本データの左端の番号はこの5桁の番号を示している。

#### 4 標本データについて

標本のデータは、標本番号に続いて、採集地、採集日、採集者、性別、年齢、タイプ標本の種類の順に示した。

[採集地]

採集地は、英語と日本語を併記し、日本語については英語の後にカッコで示した。また、地名は国、都道府県名、市町村などの行政区名で示し、山、川、島などの名称や生息場所などについてはその後に示した。また、行政区名は採集当時のものを用いた。

[採集日]

採集日は、8桁の数字で示した。最初の4桁が西暦、次の2桁が月、最後の2桁が日を示す。不明なところは「\*」の記号で示した。

[採集者]

採集者は、英語と日本語を併記し、日本語については英語の後にカッコで示した。また、原則的に氏名をフルネームで示した。漢字が特定できない人名はひらがなで記した。

[性別]

性別が分かる種（または亜種）については、オスを♂、メスを♀で示した。

[年齢]

年齢の分かる種（または亜種）については、larva（幼虫）、nymph（若虫）、protonymph（第1若虫）、deutonymph（第2若虫）、adult（成体）のいずれかを英語表記した。

[タイプ標本の種類]

タイプ標本については、holotype（ホロタイプ）、lectotype（レクトタイプ）、allotype（アロタイプ）、paratype（パラタイプ）、syntype（シンタイプ）のいずれかを太字で英語表記した。

### III 今村泰二コレクションのもつ意義

今村泰二氏は、生涯にわたって日本国内を中心にミズダニ類及びウシオダニ類を採集・研究された。このコレクションは、1932～1983年の52年間に、今村氏と今村氏と交流のあった研究者などにより収集された標本で、採集地は国内が中心であるが、アジア諸国、オーストラリアなど、海外のものも含まれる。国内では北海道、兵庫県、岐阜県など34都道府県から収集されており、標本数は海外のものも含めて、1500点以上にのぼる。今村氏は、地下水棲のミズダニ類の研究に情熱を傾けておられ、それらの標本は特に重要な意味をもつものであると言えよう。地下水棲種については、今後、新たに標本が得られない可能性もあり、その存在を示す唯一のものとも成りうるものである。

このコレクションは今村氏の生涯にわたる研究の基になったもので、今村氏の記載した種の大多数の模式標本を含む。今村氏の著したミズダニ類の論文は80余編を数え、その中で約160種にのぼる新種を記載した。今村氏の標本は、これまで国立科学博物館に約10点が保管されているのみで、それ以外の標本についてはこれまで博物館などの公的機関において保管されてこなかった。模式標本は種を定義づける基準となるものであるため、新しく種を記載する際にしばしば参照する必要がある。そのため、今村泰二コレクションが博物館に収蔵され、多くの研究者に利用可能となることが世界中の研究者によって待たれている。今後、このコレクションの標本を用いて、多くのミズダニ類の分類学的研究がなされるであろうし、それに伴って、未だ明らかとなっていない、生物の多様性の一端が解明されていくものであると確信する。

### IV この目録が完成するまで

2003年、茨城大学理学部助教授の菊地義昭氏を介し、今村氏から当館へのミズダニ類の標本の寄贈の話があった。そして、ミズダニ類の研究者である日本大学生物資源科学部助教授の安倍 弘氏による標本の整理を経て、2004年11月に正式に今村泰二氏より寄贈の申込みを受けた。しかし、今村氏が同年12月28日にご逝去されたた

め、寄贈の手続きは一時中断した。その後、2005年3月26日、水戸市にて「今村泰二先生を偲ぶ会」が開催された折、茨城大学理学部教授の森野 浩氏と菊池氏、安倍氏の3人を仲立ちとして、ご遺族の今村琢治氏、河内(旧姓 今村)まり子氏と博物館側で話し合いがもたれ、改めて、ご遺族から寄贈していただくことになった。そして、2005年4月14日、今村洋一氏、今村琢治氏、河内まり子氏より、正式に寄贈の申込みを受け、同年5月9日、茨城県教育委員会教育長より、正式に寄贈が承認され、同年6月22日に県庁で、7月30日に博物館で感謝状の贈呈式が行われた。

受け入れられた標本及びデータの整理は、安倍氏をはじめ、平塚市博物館学芸員の松本典子氏のご協力の下、動物研究室のスタッフ及び学芸嘱託員の金澤礼雄氏を中心となって行われた。また、2006年3月8日、ご遺族から今村氏の胸像、蔵書、ミズダニ類の液浸標本が寄贈された。それらの資料の整理は、元動物研究室学芸嘱託員の茅根重夫氏、金澤氏、池澤が行った。

この仕事を遂行するに当たって、たくさんの方々のご助力をいただきました。改めてここに感謝の意を表したいと思います。ありがとうございました。

(動物研究室 主任学芸員 池澤広美 記)

# The Taiji Imamura Collection

## I Scale of the Taiji Imamura Collection

The Taiji Imamura collection is composed of 1,541 samples of prepared slide specimens of water mites and marine mites. Of these, 257 species and 28 subspecies in 1,005 samples of prepared slide specimens are identified to the unit of species and subspecies respectively. Additionally, the type series reaches 28 families 59 genera, 155 species eleven subspecies (including nominotypical subspecies), which include 154 holotypes, one lectotype, 55 allotypes, 108 paratypes and nine syntypes.

## II Use of Inventory

Legend						
Superfamily Name		Family Name		Species Name or Subspecies Name		
Hygrobatoidea オヨギダニ上科		Aturidae ヒラタダニ科		<i>Albia (Spinalbia) makinoi</i> Imamura, 1965 イスズアルビダニ		
30977	Kuraguchidani, Ise Shrine, Ujitachi Town, Ise City, Mie Pref.	(三重県伊勢市宇治館町・伊勢神宮神域 倉口谷), 19650619, Taiji Imamura (今村泰二), ♀, adult, <b>holotype</b>

Specimen Number	Date of Collection	Person that Collected the Specimen	Gender	Age	Classification of Specimen Type	Locality of Collection

### 1. Arrangement of List

The arrangement of superfamilies follows the currently presumed phylogenetic relationship based on Abé (2006).

The family, species and subspecies are arranged in the alphabetical order of the scientific names.

Specimens within the identical species (subspecies) are arranged in order according to the specimen number.

### 2. Species Names (Scientific Names/Japanese Names)

Species names and subspecies names follow Abé (2006) in principle, and those which are not described in Abé (2006) follow Viets (1987). The collection contains specimens which have not been firmly named under taxonomic study as well as those already published in scientific papers. Therefore, the species list probably contains some provisional species names. *Piona uchidai* Imamura, for example, is an invalid species name because it has not been in any paper ever published. The latest check list of Japanese water mites should be referred to Abé (2005b, 2006).

### 3. Specimen Numbers

All the specimens in Ibaraki Nature Museum are distinguished by "INM" signs. As for animal specimens, the number

is affixed after the "INM-1-" sign.

The numbers between 29716 and 31256 were used for the specimens in the Taiji Imamura collection. The numbers on the extreme left of each specimen data in the lists indicate these five-digit numbers.

#### 4. Specimen Data

The specimen data indicates the specimen number first, followed by locality of collection, date of collection, person that collected the specimen, gender, age class and specimen type, in this order.

[Locality of Collection]

The locality of the collection is indicated both in English and Japanese, and Japanese is put in parentheses after the English description. Additionally, the place-names are indicated using the names of administrative districts such as country, prefecture, city, town and village, which are followed by the names of mountains, rivers, islands, etc. and habitats. Furthermore, the names of administrative districts are those as of the time of their collection.

[Date of Collection]

The date of collection is indicated with an eight-digit number. The first four digits indicate the year in the Western calendar, the following two indicate the month and the last two the date. Unknown parts are marked with an asterisk "\*".

[Person that Collected the Specimen]

The person that collected the specimen is indicated both in English and Japanese, and the Japanese name is put in parentheses following the English description. In addition, as a rule, the person's full name is used. Hiragana is used when the kanji for the person's name cannot be identified.

[Gender]

In regard to species (or subspecies) of which the gender can be determined, male and female are indicated using the symbols "♂" and "♀" respectively.

[Age Class]

As for species (or subspecies) of which the age class can be determined, either larva, nymph, protonymph, deutonymph or adult is indicated in English.

[Classification of Specimen Type]

As for the specimen type, either holotype, lectotype, allotype, paratype or syntype is indicated in boldface in English.

### III Significance of the Taiji Imamura Collection

Dr. Taiji Imamura devoted his whole life to the collection/study of water mites and marine mites mainly in Japan. This collection is of the specimens that Dr. Imamura and researchers that interacted with him, and others, collected in the 52-year period between 1932 and 1983 from locations centering on Japan and including overseas such as other Asian countries and Australia. From Japan, specimens were collected from 34 prefectures, including Hokkaido, Hyogo and Gifu Prefectures. The number of specimens, when including those that were collected from overseas, reaches 1,500 or more. Dr. Imamura was passionately devoted to research on subterranean aquatic species of water mites and thus the specimens of those species can be described as specimens that particularly take on major significance. Factoring in the possibility that no new specimens of subterranean aquatic species may ever be obtained in the future, these may possibly become the only evidence of its presence.

This collection is based on Dr. Imamura's lifetime of research and contains type specimens for a large majority of the species for which Dr. Imamura made descriptions. Research papers on water mites written by Dr. Imamura total over 80, in which as many as about 160 new species are described. Aside from only about ten specimens having been under the custody of the National Science Museum, Tokyo in the past, the rest of Dr. Imamura's specimens have never been viewed at museums and other public institutions to date. Type specimens serve as the standard for defining a species and must be

often referred to when making a new description of a species. Consequently, researchers the world over have long been waiting for the day when the Taiji Imamura collection was housed in museums and made available to many researchers. I am convinced that extensive studies on the taxonomy of water mites will be conducted in the future based on the specimens of this collection and that this, in correlation, will reveal a part of the biodiversity that remains yet to be unveiled.

#### IV The Process of Completing This Inventory

In 2003, Imamura proposed the donation of this collection of specimens of water mites to our Museum via Dr. Yoshiaki Kikuchi, Assistant Professor at the College of Science of Ibaraki University. Subsequently, after arrangement of the specimens by Dr. Hiroshi Abé, Assistant Professor at the College of Bioresource Science of Nihon University, Dr. Taiji Imamura officially offered this donation in November 2004. However, since Dr. Imamura passed away on December 28, 2004, the procedures for the donation were suspended. Later, on March 26, 2005, when a "commemorative gathering for Dr. Taiji Imamura" was held in Mito City, a discussion was conducted between the bereaved family, Mr. Takuji Imamura and Mrs. Mariko Kawauchi (maiden name: Imamura) and the Museum side through the mediation of three people, Dr. Hiroshi Morino, Professor of College of Science, Ibaraki University, Dr. Kikuchi and Dr. Abé. As a result of this discussion, it was decided that the collection would be donated by the bereaved family. Then on April 14, 2005, we received the official notice of the donation from Mr. Youichi Imamura, Mr. Takuji Imamura and Mrs. Mariko Kawauchi. After the donation was officially approved by the superintendent of the Ibaraki Prefectural Board of Education on May 9, 2005, the ceremony to present a certificate of appreciation was held at the prefectural government offices on June 22, 2005 and at the Museum on July 30, 2005.

Accepted specimens and data was arranged mainly by the staff of the zoological laboratory and part-time assistant curator, Mr. Ayao Kanesawa, under cooperation of Dr. Abé and Ms. Noriko Matsumoto, assistant curator of the Hiratsuka City Museum. Additionally, a bust, a library and immersion specimens of water mites belonging to Imamura were donated by his bereaved family on March 8, 2006. These materials were arranged by Dr. Shigeo Chinone, the former part-time assistant curator of the zoological laboratory, along with Mr. Kanesawa and Ikezawa.

Many people provided support in the process of accomplishing this project. I would like to express my deep gratitude to them here. Thank you very much.

(Hiromi Ikezawa, Curator, Zoological Laboratory)
